# INTERNATIONAL MASTERCLASSES HANDS ON PARTICLE PHYSICS

Interactive educational material on Particle Physics in 22 languages,  
collected and translated by the International Particle Physics Outreach Group IPPOG

- What are the fundamental building blocks of matter?
- Which forces hold them together and how do they work?
- How far have forces and matter been understood?

Find answers to these and other questions by browsing, reading and working through the Web systems collected on this DVD in 22 languages. Most of the material contains interactive elements, some even real particle physics events for making your own measurement.

System requirements: Web Browser, Java, Shockwave and Media Player
